

Technical Data Sheet

Enamel for domestic appliances

Technical Information

Strong water proof enamel. Endures up to +100°C. Resistant to washing substances and temperature changes. Used for restoration and painting the outsides of domestic appliances: fridges, freezers, washing machines, drying drums, microwave ovens, air extractors etc.

Quality & properties

- Withstands temperatures up to +100°C.
- Resistant to detergents and temperature changes.
- Does not require preliminary priming.
- Do not varnish after painting.

Physical & chemical data

Content: 400 ml

Base: acryl resin

Color : white

Paint effect : gloss

Coverage area: 1,2-1,5 m²

Drying time to degree 3 at 20 (±2)°C: no more 30 minutes

Density at 20 (±2)°C: 0,75-1,20 g/cm³

Coating adhesion to metal : no more 2 score

How to use

Before use, carefully read the directions on the packaging and act accordingly.

The surface should be clean, dry and free of grease. Remove loose old lacquer and rust and sand the surface.

Do not apply any primer

Before use, shake the aerosol for 2 minutes and spray a sample. Distance to the surface to be treated approximately 25 to 30 centimetre.

Apply 2-3 thin layers with an interval of 3-5 minutes. Do not varnish after painting

After use, clean the valve (turn aerosol upside down and press the nozzle for approximately 5 seconds).

Conditions of storage and transportation of products: Products are transported by any ground mode of transport in compliance with the rules of cargo transportation. Products in packaged form must be stored in premises that protect products from chemical influences and mechanical damage at a temperature not lower than minus 20C and not higher than plus 40C.

Stability during storage: 5 years from the date of manufacture. The date of manufacture is indicated on the bottom of the aerosol.
