

### Technical Information

Pre-fill standard is a pre-filled can with propellant gases and solvent (275 ml) that can be filled with solvent-based basecoats (max. 100 ml). Ideal for spot repair or refinishing parts. A spray can pre-filled with propellant and solvents. The paint is transferred via a filling device into the can to produce a ready-to-use end product (dealers liability)

### Physical & chemical data

#### Quality & properties

- simple, time-saving application
- excellent atomisation
- light blending.

**Content:** 400 ml

**Base:** solvents

**Efficiency:** depending on consistence and colour of the ground

**Substrate:** depending on the colour of the substrate applicable on Primer filler, 2K Primer filler, 1K Epoxy primer, cured paint sanded

**Drying time at 20°C, 50% relative air humidity:** drying time depends on surrounding temperature, air humidity, thickness of the applied coat and the filled type of paint (refer to information of the paint manufacturer)

### How to use

Before use, carefully read and observe the warning texts on the label!

- Clean the surface to be painted thoroughly with Silicone remover, then sand
- Larger bare surfaces must be pre-primed with the appropriate Chamäleon primer
- The area must be dry and free of dust and grease
- Shake the can vigorously for 2 minutes
- Carry our spray test
- Compatibility testing is necessary

**Conditions of storage and transportation of products:** Products are transported by any ground mode of transport in compliance with the rules of cargo transportation. Products in packaged form must be stored in premises that protect products from chemical influences and mechanical damage at a temperature not lower than minus 20C and not higher than plus 40C.

**Stability during storage:** 5 years from the date of manufacture. The date of manufacture is indicated on the bottom of the aerosol
